

MARILYN TRAEGER

**Here's what you'll need:**

**Laptop**

Please go online and get a free trial copy of Photoshop [here](#) or Photoshop Elements [here](#). Make sure you wait a day or two before your workshop begins. This free trial only lasts for 7 days. If you rather, purchase a copy of Photoshop Elements for \$99 [here](#). Elements is a wonderful way to begin with Photoshop.

Make sure your laptop is charged for the day of the workshop. If your computer cannot hold a charge for each day we will have extension cords available.

**Images**

The more images you save – the more options you have!

- Make a folder on the desktop of your laptop computer and call in ARTSville.
- Please make subfolders named: people, landscape, flora and fauna, background, and texture.
- Then save your images in the appropriate folder. Make sure that you save your photos with the largest size that you can.
- You may alternatively put your images on your Google file and share them with me.
- If you have difficulty achieving either of these options before the workshop you can send your images to [marilyn.traeger@gmail.com](mailto:marilyn.traeger@gmail.com). Make sure to put ARTSville images in your subject.

If you don't have any images you'd like to use, we can supply them for you.
